EDUCATION

ABES Engineering College, Ghaziabad — B.Tech, Information Technology (CGPA: 7.43/10)

2023 – 2027

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Database:** MongoDB, MongoDB Atlas, MySQL
- **Cloud & Tools:** Git, GitHub, Linux, Postman, Google Cloud Vision API, Vercel, Render, Netlify
- **AI / ML:** Gemini API, OCR, OpenCV, NLP, Prompt Engineering, AI Workflow Automation, Agentic AI (Learning)
- **Computer Science:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Frontend Developer — MetalMarket.in Pvt. Ltd.

Remote | 2 Months

- Developed responsive React.js interfaces for a production client application, improving usability and consistency across desktop and mobile devices.
- Integrated frontend with backend REST APIs, enabling seamless real-time data flow and dynamic user interactions.
- Built reusable, component-based UI architecture that reduced development effort and improved long-term maintainability.
- Optimized frontend performance and load times, contributing directly to improved user experience in a live production environment.

PROJECTS

EvalAI — AI-Powered Handwritten Answer Sheet Evaluation Platform -

[EvalAI_Live](#)

- Architected and shipped a production-ready, full-stack AI SaaS platform that automates evaluation of handwritten exam booklets, replacing a manual grading workflow for educators.
- Built a bulk PDF upload and queue-based processing pipeline that extracts handwritten text via Google Cloud Vision OCR, enabling scalable evaluation across large student batches.
- Engineered an AI evaluation engine using Gemini AI for question-wise marking and automated, context-aware feedback generation on student answers.
- Designed secure multi-user workflows with JWT authentication across a React.js, Node.js, Express.js, and MongoDB stack.
- Developed automated Excel report generation and a class-level analytics dashboard, giving educators actionable insight into topic-wise and student-wise performance.
- Deployed and maintained the application in production using Render (backend) and Netlify (frontend), managing real-world deployment constraints end-to-end.

MiniVSCode — Java-Based IDE -

[Arshiv341/ABES-java-code-editor: Java Code Editor By Ritik Tiwari](#)

- Built a lightweight Java IDE from scratch using Java and JavaFX, featuring a code editor interface, file management, and the ability to compile and run Java programs directly within the app.
- Integrated an embedded Apache Tomcat (10.x) server using Maven and custom ProcessBuilder logic, enabling users to run and test local web applications with full server lifecycle management (start/stop) without external configuration.
- Applied modular Java architecture and file-system handling APIs to design a maintainable, extensible IDE codebase.

ACHIEVEMENTS

- Built and deployed EvalAI, a production-ready AI SaaS application solving a real educational workflow, end-to-end.
- Completed Cisco Networking Certification.
- Completed ISRO Geo-Data Sharing Certification.
- Completed a Frontend Development Internship at a live client company (MetalMarket.in).

CERTIFICATIONS

- Cisco Networking Certification | ISRO Geo-Data Sharing Certification | Infosys HTML5 Certification | Git & GitHub Masterclass
